Benefits (Maintenance Of Pregnant Desi Indigenous Cows Ration For BPL Families)

- Benefits: The scheme for maintenance of pregnant Desi/Indigenous cows ration for BPL families of all categories of livestock farmers in Himachal Pradesh can have a significant impact on the health and livelihoods of farmers, as well as the overall development of the region. This scheme in Himachal Pradesh can have several benefits, such as: Improved cow health: A balanced and nutritious diet for pregnant cows can improve their health and reduce the risk of health complications during and after pregnancy. Improved calf growth and development: A well-fed pregnant cow can provide better nutrition to the growing calf, leading to better growth and development. Increased milk production: Adequate nutrition can improve the milk production of the cow, leading to increased income for the farmer. Better breed quality: The scheme can also include provisions for breed improvement, leading to better quality Desi/Indigenous cows that can provide better milk yield and meat quality. Employment generation: The scheme can create employment opportunities in the feed and fodder development sector, leading to better livelihoods for farmers. Reduced poverty: The scheme can help BPL families and all categories of livestock farmers to improve their income and reduce poverty. Improved food security: Improved milk production and better quality meat can contribute to better food security in the region. Expected Outcome: After feeding a balanced ration during the last trimester of pregnancy, milk production increased by 2 ltr/day. With the assumption that during lactation of 300 days, the farmer will market this milk at @ 30/ltr, his income will increase by

Rs.18000/year (Approx.).
